ABOUT ME

I have always possessed the passion for computers and technology around the world. I jumped in the Tech community with the purpose to learn and be part of this amazing conglomerate of people. I am excited to begin my new career as a software developer.

LANGUAGES

Bilingual in English and Italian

PROJECTS

github.com/FortunatoMugnano/Sapori-D-Italia
Sapori D'Italia

Built a browser-based application called Sapori D'Italia utilizing **React, React-strap, Javascript, HTML,** and **CSS**. Created a personal **API** to return recipes divided by 20 Italian regions. Users can save to a personal cookbook session or add new recipe to the expanding database with full **CRUD functionality.** Users can also communicate through a messaging session provided by the application.

https://github.com/FortunatoMugnano/Capstone
Enter-Q!
Built a full-stack application called Enter-Q! With this application, users can track job searches in a user-friendly and organized way. The home page has five sections were users can drag and move the Job's Card around them. **Entity** and **Identity frameworks** were used for the back-end creation of the **Database pipeline**, along with **C#** and **ADO.Net Core**. The client's side was made using **React.Js**. Styling library was **Bootstrap** and **React-Select.**

EDUCATION

Nashville Software School
Software Developer BootCamp

Instituto Tecnico Commerciale Enrico Caruso
Accounting and Bookkeeping
Naples, Italy

WORK EXPERIENCE

Nashville Software School   **August 2019 - February 2020**
Software Developer
- Built full-stack applications using **HTML, CSS, JS, C# , ASP.net Core** and **SQL server** with **Git/GitBash control**
- Focused on user experience with design around brand standards, efficiency, and smooth functionality
- Styled applications with **CSS FlexBox** and libraries such as **Bootstrap, Ant Design, and ReactStrap**
- Use of **Visual Studio** and **Visual Studio Code**

GHOST PAC, group project
https://github.com/nss-day-cohort-35/ghoul-diggers
Social media site for PAC-MAN ghosts. A dashboard to organize daily tasks, events, news article, friends, and chat messages. The app was built using **React, CSS, JSON Server, webPack boilerplate** and **Npm**. My role in the group was to manage the news and task sections plus the daily operations of team support. The major design for the site was built using **Ant Design** and **CSS FlexBox**. Software control and organization was provided using **GitHub**

BANGAZON , group project
https://github.com/nss-day-cohort-35-csharp/Bangazon-Site-Red-Jaguars
Part two and three of a project made using **Agile** methods in a **SCRUM** environment. Worked closely with two other team members to produce the workforce side (HR, Employees, Departments) and the e-Commerce side of a fictional virtual marketplace. Utilized **ADO.NET** and **SQL** Server to access Bangazon workforce data and manipulate it using the **MVC** pattern with **Razor**. Responsible for the Employee resource views and integration testing of these resources.

Avis Budget Group   **February 2018 - July 2019**
Regional Fleet Clerk
- Managed Middle Tennessee and southern Kentucky fleet for one of the world's largest rental car companies
- Managed logistics and customer requests for 12 local market locations in Middle Tennessee and southern Kentucky
- Maintained and upheld the corporate priorities, as well as the company's short and long term goals such as daily car movement needs and weekend demand
- Supervised 15-20 drivers daily, creating a flow schedule and a perfect logistic environment in order to assure a working and functional workday

Bella Napoli Pizzeria   **January 2017 - January 2018**
